February 15, 2005

Dear Friends,

We have much to be proud of here as we end our first 9 months of task force meetings. The members of Santa Cruz Transportation, LLC want to thank all the task force members and contributors for the time and energy put forth on behalf of seniors and disabled and all the Santa Cruz community. It makes our community proud and rich, when we have intelligent and empathetic leaders who care so much in giving the ideas and resolutions needed by this network of people who live and work in Santa Cruz County.

In particular, we want to thank everyone from the RTC, in the superb manner in which the information was presented and sent to all of us prior to the meetings. We want to express our sincere thanks to Bryant and Steve and all the extraordinary staff at the Metro District, who very capably have transitioned the ADA contract to satisfy most every client. Next, we want to thank Community Bridges and the team led by Sam and Link for their most courageous effort under the most trying financial situation. We want to thank the efforts and perseverance of all the County agencies that act on behalf of those who most need the help of a stable and resilient society. Thanks to all the physicians and nursing and technical staff who care for our loved ones without the fanfare and appreciation they deserve. Thanks to all the politicians in our community, who care about the people and issues that are unpopular in today's climate, but still need the focus of our elected leaders.

Last and not least, we want to thank all of our workers and operators in the community who make a sacrifice every day to continue the service that our people expect in a just and free society. The reality is, we are the ones who make the adjustment necessary to continue the quality of life as we know it should be. We can hope that someday the funding is found to bring the ideas of our task force members to life.

Very truly yours,  
James C. Monroe
