SAFE ON 17 Highway 17 Safety Corridor

2013 Annual Report

January 1, 2013 to December 31, 2013

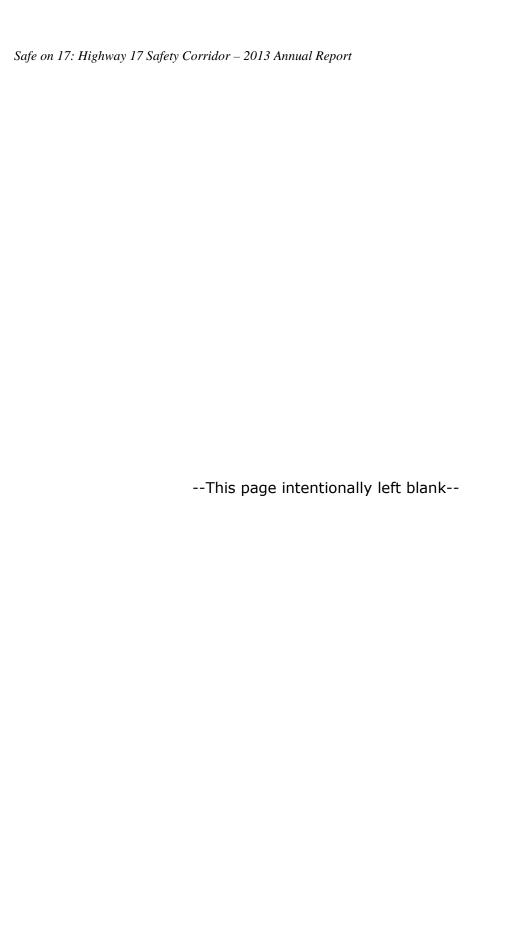

Introduction

High collision rates on Highway 17 precipitated the formation of the Safe on 17 Task Force in 1999. The task force was convened to identify conditions and behaviors contributing to collisions on the corridor and to recommend and implement solutions. The task force drew from a broad set of disciplines to assemble strategies that would reduce the high collision rate. Strategies included enhanced enforcement, engineering (capital improvements), signing and striping, public education and awareness.

The present goal of the Safe on 17 Program is to maintain the reduced collision rate achieved during the period funded by an Office of Traffic Safety grant (1999-2002) using a combination of the original recommendations made by the task force. Engineering improvements, enhanced CHP enforcement tactics, public outreach about motorist safety on Highway 17, and a traffic operations system contributed to surpassing this goal in 2013. The task force also continued to collect data to measure consistency with program goals, benchmark progress and monitor where additional improvements may be needed. Typically, safety corridor designations expire after a few years. However, the segment of Highway 17 between Highway 1 in Santa Cruz County and Highway 9 in Santa Clara County has maintained its safety corridor designation for more than a decade (Attachment 1).

Funding for extra CHP enforcement is provided by the Santa Cruz County Regional Transportation Commission Service Authority for Freeway Emergencies (RTC SAFE) and the Metropolitan Transportation Commission Service Authority for Freeways and Expressways (MTC SAFE) in the combined amount of \$100,000 per year for each year covered in the funding agreement.

Caltrans continued to make capital improvements to Highway 17 in 2013. The Santa's Village Road Guardrail Project was completed. The Highway 17 Summit Slide Repair and Highway 17 Guardrail Upgrade projects were under construction in 2013. All of these projects are being constructed with the intent to reduce the number of collisions on Highway 17.

2013 Highway 17 Summary of Facts

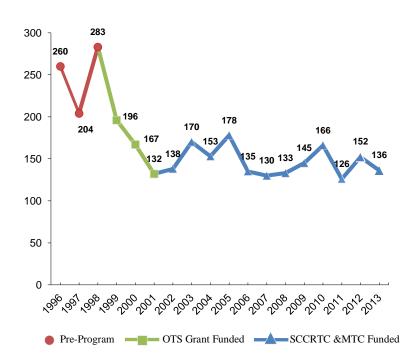

- ▶ There were 2 fatal collisions and 134 injury collisions on the safety corridor in 2013.
- ► The 2013 injury and fatal collisions surpassed the goal of maintaining the reduction in collisions achieved during the OTS grant period of 165 injury and fatal collisions.
- ▶ The total number of collisions for 2013 is 420, which ties with 2009 for the lowest number of collisions on record since 1996.
- ► CHP wrote an average of 27 citations per day on Highway 17

Collisions

One hundred and thirty four injury collisions and two fatal collisions were reported in 2013. The fatal and injury collisions for 2013 were 46% lower than the preprogram average of 249. This reduction translates into 115 fewer fatal and injury collisions and 252 fewer property damage only collisions on the Highway 17 Safety Corridor for 2013 compared to the preprogram average.

The Task Force strategies have reduced the number of fatal and injury collisions by an average of 40% over the last 14 years from the preprogram average of 249. The 2013 injury and fatal collisions at 136 surpassed the goal of the Task Force of maintaining the reduction in collisions achieved during the OTS grant period of 165 injury and fatal collisions. Figure 1 shows the annual injury and fatal collision data between 1996 and 2013. A breakdown of collisions by type is provided in Attachment 2.

Figure 1: Annual Total Fatal & Injury Collisions on Highway 17, 1996-2013

A detailed comparison between 2013 monthly collisions and historical averages (1999-2012) is provided for both Santa Cruz and Santa Clara Counties in Attachment 3. On the Santa Cruz County side of Highway 17, the highest number of total collisions (injury, property damage only and fatal) occurred in April and November 2013. On the Santa Clara County side, the highest number of collisions occurred in September 2013.

A combination of speeding, tailgating and unsafe lane changes (also called primary collision factors) are considered to be the most frequent factors leading to collisions on Highway 17 but distracted driving is also a growing threat to road safety. Since the Safe on 17 program began in the late 1990's a number of developments have increased driver distraction. These include:

- Significantly increased cellular phone usage
- Proliferation of text messaging over cellular phones

- Availability of smart phones with access to email and many other functions
- Usage of navigation systems through a variety of devices

Due to the proven negative impacts of these additional driver distractions, laws have been passed and campaigns have been waged to curtail their effect on collisions, yet many people drive under the influence of these distractions. Despite these additional factors that can cause an upward trend in the number of collisions, the Safe on 17 program has maintained the reduced collision rate that was achieved during the period funded by a grant from the Office of Traffic Safety (1999-2002.)

External factors may also influence the total number of collisions. Wet weather is considered to increase traffic collisions due to wet pavement and a decreased visibility. Monthly rainfall data is plotted with the injury and fatal collision data for 2013 in Attachment 4. Injury and collision data were highest in the spring and summer months of March through July. The rainfall was extremely low in 2013 with a total yearly rainfall of 5.1 inches compared to a yearly average of 30.25 inches. The highest rainfall months for 2013 were March and April which accounted for about half of the yearly rainfall.

Traffic conditions are considered to be a factor in the number of collisions. Traffic conditions can be assessed in a number of ways including the Average Annual Daily Traffic (AADT). On Highway 17, the AADT has varied little since the initiation of the Safe on 17 Program and thus cannot be a factor contributing to the large reduction in the number of collisions on Highway 17 since the initiation of the Safe on 17 Program.

California's basic speed law reminds us that as drivers, we are all responsible to drive in a manner that is reasonable and prudent with regard for weather, visibility, traffic and surface and width of the highway and that does not endanger the safety of people or property (CA Vehicle Code 22350).

Extra CHP Enforcement

Extra CHP enforcement is an essential element of the Safe on 17 Program. The extra CHP enforcement is dispatched along all of the Highway 17 Safety Corridor, which is located between the Highway 1/17 interchange in Santa Cruz County and the Highway 9/17 interchange in Santa Clara County. Increased CHP enforcement on Highway 17 prevents collision causing behavior in two ways. First, high CHP visibility on Highway 17 serves to encourage safer driving and deter traffic violations. Second, increasing the number of citations is a mechanism for encouraging motorists to adhere to the rules of the road.

The Santa Cruz and San Jose CHP offer a list of overtime opportunities to their officers, which makes-up the extra enforcement on Highway 17. The number of enforcement hours per month is dependent upon CHP staffing levels, competing overtime opportunities, and training requirements. In 2013, a total of \$101,001 was spent on extra CHP enforcement and 1,152 hours of extra CHP enforcement were worked (Table 1). Attachment 5 summarizes the extra enforcement by month for 2013.

Table 1: Annual Extra CHP Enforcement Hours Worked & Safe on 17 Funds Used

	San Jose CHI	P	Santa Cruz (CHP
Year	Extra	Safe on 17	Extra	Safe on 17
	Enforcement	Funds	Enforcement	Funds
	Hours	Used	Hours	Used
	Worked		Worked	
2003	490	\$31,197	850	\$47,913
2004	610	\$38,129	709	\$45,728
2005	601	\$39,495	730	\$49,631
2006	680	\$51,590*	636	\$47,858
2007	909	\$76,953*	565	\$49,738
2008	706	\$61,652*	737	\$68,023*
2009	591	\$47,651	399	\$36,709
2010	22	\$1,842	308	\$27,224
2011	828	\$65,970**	705	\$55,047*
2012	576	\$45,072	681	\$54,045*
2013	340	\$30,849	812	\$70,152**

^{*} Between 2006 and 2009, CHP was permitted to carryover funds not spent during the prior years to the current year, thus resulting in more than \$50,000 expended in services in some years. A new contract was initiated in 2009 with CHP and no unspent funds were carried over into the new contract, thus limiting expenditures in 2009 to \$50,000 per year for Santa Cruz and San Jose CHP. Santa Cruz CHP is permitted to carryover any unspent funds in future years.

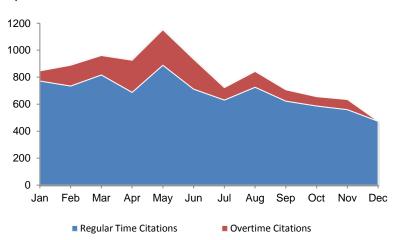

^{**}The RTC provides the funds on a fiscal year and thus the amounts may be higher than \$50,000 when summed on a calendar year as reported here.

Citations

A total of 9,735 citations were issued on Highway 17 during 2013. Of these,

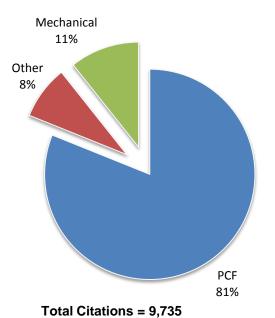

1,553 were given during Safe on 17 extra enforcement hours. Citations issued during overtime in 2013 made up 16% of citations. Total yearly citations since about 2008 have been on average about 9,000 to 10,000. In the earlier years of the program (2003 - 2007), total citations were in the range of 11,000 to 14,500 per year.

Figure 2: 2013 Highway 17 CHP Citations by Regular & Overtime Hours

The most overtime citations per month for 2013 were given in the beginning of the summer tourist season. Figure 2 illustrates the number of citations given during

Figure 3: Total Citations by Citation Type (Primary Collision Factor, Mechanical, Other)

regular hours and overtime hours. Attachment 6 provides a summary of annual total overtime and regular time citations and Attachment 7 charts the annual citations from San Jose and Santa Cruz compared to historical averages. During extra CHP enforcement hours on Highway 17, officers focus on preventing behavior that is known to be a primary collision factor (PCF) such as speeding, tailgating or making unsafe lane changes. These focused efforts help achieve the Safe on 17 Program goal of limiting the number of injury and fatal collisions. Accordingly, in 2013, 78% of citations recorded during extra enforcement hours were for PCF violations as well as 81% of all the citations given on Highway 17 (Figure 3).

CHP Data Reporting

As required, the Santa Cruz area and San Jose area CHP offices have been providing monthly collision and citation data since the Program's initiation (<u>Attachment 8</u>). The data is important for monitoring program effectiveness.

Safe on 17 Task Force Meetings

The Safe on 17 Task Force is comprised of representatives from the San Jose and Santa Cruz area CHP, Caltrans Districts 4 and 5, MTC SAFE, RTC SAFE, local legislators' offices, local media, trucking industry, local police and fire departments (<u>Attachment 9</u>). In 2013, members continued to regularly attend the two scheduled meetings (March 13 and September 25) and committed to staying involved and working towards improving safety on Highway 17.

In 2013, the Task Force discussed the outcomes of the CHP's extra enforcement efforts, provided input on current Caltrans' Highway 17 projects and maintenance activities, and provided input on potential Highway 17 improvements. In addition, the Task Force routinely discusses issues related to the handling of incidents on this unique multi-jurisdictional corridor, opportunities for agency coordination, public education related to motorist safety, and Freeway Service Patrol Program activities.

Like in previous years, in 2013 both of the Safe on 17 meetings were combined with the RTC Traffic Operation Systems Oversight Committee Meetings. There is a significant overlap in membership in these committees and subject matter. Traffic operation systems elements such as closed circuit television cameras and changeable message signs can be tools for enhancing safety on the Highway 17 corridor and require coordination between the separate CHP and Caltrans jurisdictions covering the Highway 17 safety corridor.

Public Information

In 2013, RTC SAFE, MTC SAFE, CHP and Caltrans continued to provide information to the public about the extra enforcement and safety on Highway 17. In 2013, CHP included information about safe driving on Highway 17 at CHP sponsored events, including new driver education programs held at high schools and motorcycle and community events. CHP also reminded the public about safe driving on Highway 17 during regular interviews and when reporting to the media about Highway 17.

In addition, in 2013, press releases were published by CHP which highlight extra enforcement efforts and educate motorists about safe driving (<u>Attachment 10</u>). The public was also reminded to drive safely using the changeable message signs

located on Highway 17. Similar to previous years, the "Click it or Ticket", "Slippery Roadway Reduce Speed", "Share the Road Look Twice for Motorcyclists" and "Hands Free It's the Law" were frequently posted messages.

Highway Safety Improvements

Guardrail Improvement Projects

The Highway 17 guardrail project to upgrade guardrails at twenty-eight different locations between Scotts Valley and the Summit in Santa Cruz County (PM 6.1-12.5) was under construction in 2013. Guardrail improvements include upgrading end treatments to current standards, replace/reconstruct metal beam guardrail, and replace some metal beam guardrail with concrete rail or K-rail. Guardrails can prevent vehicles from veering off the roadway or into oncoming traffic, or crashing against solid objects. The remaining part of this project is scheduled to be completed in 2014.

Santa's Village Road Guardrail

The Santa's Village Road Guardrail Project to provide a wider southbound (outside) shoulder and construct a concrete guardrail in an area where no guardrail previously existed was completed in 2013(PM 6.1/6.5 SB).

Hwy 17 Summit Slide Repair

A project to construct a retaining wall with concrete slab and barrier along Hwy 17 near Scotts Valley (0.2 miles north of Glenwood Dr.) began construction in spring 2013. This project is anticipated to be completed by spring 2015.

Highway 17 Access Management Plan

Caltrans District 5 is working with Santa Cruz County, California Highway Patrol and the Santa Cruz County Regional Transportation Commission to develop a plan that will identify issues and imbalances in access and mobility on Highway 17 between Granite Creek Rd in Scotts Valley and Summit Road at the Santa Cruz/Santa Clara County line. Public Outreach is a key component of the plan. The study will identify local, regional, and interregional needs through stakeholder engagement. This long term plan is needed to compete for funding to address access issues along this corridor.

Conclusion

Although there were two fatalities and 134 injuries on the Hwy 17 corridor during 2013, the Safe on 17 Program surpassed the goal of maintaining the reduced injury and fatal collisions (165) experienced during the initial Office of Traffic Safety grant period. The total number of collisions in 2013 tied with 2009 for the lowest on

record since 1996 (420 total collisions). Many factors contributed toward maintaining a reduced number and severity of collisions on Highway 17 in 2013. There have been significant engineering improvements to Highway 17 since its designation as a safety corridor. During 2013, Caltrans continued to implement safety improvements aimed at reducing wet weather and run-off-road collisions through guardrail upgrades and retaining wall construction. Through public education, primarily CHP Start Smart events, and Caltrans signs (both static and changeable message signs), motorists are getting the message to "Take it Slow" on Highway 17. Extra CHP enforcement also provides a powerful disincentive to motorists to stop behaviors that cause collisions such as speeding, tailgating and unsafe lane changes. Despite the reduction in the number of collisions since the designation of Highway 17 as a safety corridor, the total number of collisions still warrants continued attention to improving safety on Highway 17. The Safe on 17 Task Force members continue to work collaboratively to identify and address factors that will have the greatest influence on reducing the number of collisions.

CHP ENCOURAGES TEENS TO 'START SMART' AND STAY SAFE

SACRAMENTO, Calif. – Traffic collisions are the leading cause of death of teenagers across the United States and in California. Each year, thousands of young drivers and their passengers are killed in collisions. According to the California Highway Patrol's (CHP) Statewide Integrated Traffic Records System for 2010, the most recent year for finalized data, there were more than 57,000 drivers between the ages of 16 and 19 involved in collisions in California. A teen driver was determined to be at fault in 67 percent of those collisions.

"The first year behind the wheel for a teen driver can be one of the most dangerous times in their life. Teens are far more likely to be killed in a vehicle collision than in anything else," said CHP Commissioner Joe Farrow. "Developing safe driving habits is the first step toward avoiding a collision."

Designed for newly licensed teen drivers and their parents, the CHP offers *Start Smart*, a two-hour driver safety education class that is conducted throughout the state. The free program is an interactive driver safety class for teens and their parents. During the course, officers and speakers illustrate the critical responsibilities of safe driving and collision avoidance techniques. Parents are also reminded of their responsibility to teach their new driver and model good driving behavior.

"Our goal is to have teens and their parents leave the class more aware, better educated, and better prepared," added Commissioner Farrow. "Our Start Smart program has had a positive impact on thousands of parents and teens in recent years."

Parents and teenagers can sign up for a *Start Smart* class by contacting their local CHP office. To locate a CHP office near you, visit www.chp.ca.gov.

Funding for this program was provided by a grant from the California Office of Traffic Safety through the National Highway Traffic Safety Administration.

CHP SENIOR DRIVING CLASS AIMS TO KEEP EVERYONE SAFE

SACRAMENTO, Calif. – California's senior population is proving to be one of the fastest growing driving-age demographics in the state. It is estimated, there will be over six million residents age 65 and older in California by the year 2020. Knowing that much of this community still relies on driving as their primary means of transportation, the California Highway Patrol (CHP) is continuing the Age Well Drive Smart program.

The Age Well Drive Smart class is an education program specifically designed to help seniors tune up their driving skills, refresh their knowledge of the rules of the road, learn about normal age-related physical changes and how they affect driving ability. The program is supported by the Keeping Everyone Safe IV grant from the California Office of Traffic Safety.

"During the class, seniors have the opportunity to view curriculum designed to address their needs, share their personal concerns, ask questions, and consider the different options available to them," said CHP Commissioner Joe Farrow.

The CHP has partnered with the California Department of Motor Vehicle's Senior Ombudsman program and other members from both public and private organizations to assess the needs of the senior driving community. The class is approximately two hours and is offered at local CHP offices as well as many senior centers within the community. The class is a great way for our seniors to educate themselves, evaluate their driving abilities, and improve their driving skills.

"We can help better prepare seniors to drive safer for the years ahead," continued Commissioner Farrow. "Our ultimate goal is saving lives."

If you or a family member would like to attend an Age Well Drive Smart class, contact your local CHP office. To locate a CHP office near you, visit www.chp.ca.gov.

Funding for this program was provided by a grant from the California Office of Traffic Safety through the National Highway Traffic Safety Administration.

CHP OUT IN "FULL FORCE" THIS MEMORIAL DAY WEEKEND WITH ONE GOAL IN MIND, TO SAVE LIVES

SACRAMENTO, Calif. – Memorial Day is a time to show our appreciation for the men and women who fought, and those who still are fighting, for our country. Many Californians will celebrate this occasion, which also kicks off the summer travel season, with social gatherings, outdoor events, and barbeques. The California Highway Patrol (CHP) encourages you to enjoy the holiday but always designate a non-drinking driver and buckle up.

The CHP will be out in full force this holiday weekend in an effort to reduce roadway deaths and prevent injuries. The Memorial Day Maximum Enforcement Period (MEP) begins on Friday, May 24, at 6 p.m. and continues through Monday, May 27, at 11:59 p.m. All available officers throughout the state will be deployed during the MEP to focus enforcement on occupant restraints, speed violations and DUI drivers.

During the 2012 Memorial Day weekend, 25 people were killed in collisions throughout California. Among those killed within CHP jurisdiction, nearly 60 percent were not wearing a seat belt at the time of their collision. The CHP's holiday enforcement effort coincides with the 2013 "Click It or Ticket" seat belt enforcement campaign, which continues nationwide through June 2, 2013.

"The CHP's primary mission is to prevent the loss of life. We will accomplish this through education and enforcement," said CHP Commissioner Joe Farrow. "We want you to enjoy and celebrate, but we ask you to do it responsibly."

With more than 1,300 arrests for driving under the influence during Memorial Day weekend 2012, the CHP will be on the lookout for impaired drivers and cracking down on those who make the decision to drink and drive.

"Always designate a sober driver when you plan to go out over the weekend; the alternate choice could cost you your life," added Commissioner Farrow.

57,000 Distracted Driving Month Tickets in April; Cell Phone Usage Rate Down

(Sacramento, CA) – More than 57,000 drivers were ticketed for handheld cell phone talking or texting during April's Distracted Driving Awareness Month, according to the California Office of Traffic Safety (OTS) and the California Highway Patrol (CHP). The citations written by CHP officers as well as over 250 local law enforcement agencies across the state match the number handed to drivers in last year's April campaign. The monthly number of cell phone tickets outside of this special high visibility enforcement averages 36,000 violations. Over 3,500 citations were handed out for other types of distracted driving violations.

The Office of Traffic Safety also announced today that the percentage of drivers actively using cell phones at any one time in the state dropped from 10.8 percent in 2012 to 7.4 percent in 2013, nearly returning to the baseline 2011 total of 7.3 percent. The largest drop, 33 percent, was from those holding a cell phone to their ear. The information was contained in the third annual cell phone observational survey conducted in March by OTS through the UC Berkeley Safe Transportation Research and Education Center. The results are likely the low-end indicators due to the short, limited view observation of whether a driver was using a phone, especially for texting.

"We are very encouraged to see the usage figures decline, especially after the increase last year," said OTS Director Christopher J. Murphy. "But any number is too high, since any usage of cell phones while driving takes away too much of our brain's ability to react to what's happening on the road, not to mention when our hands or eyes are disengaged also."

Law enforcement agencies from across the state joined in the high visibility enforcement efforts of the April campaign. Officers have been witness to the ever increasing number of crashes in recent years due to cell phone use and other distracted driving. Participating agencies came together for two area-wide concentrated enforcement days during the month as well as smaller city-wide enforcement days.

"The month of April is behind us, however, distracted driving awareness education and enforcement continues for law enforcement statewide," said CHP Commissioner Joe Farrow. "Inattention while driving is a dangerous behavior with potentially deadly consequences. Motorists, especially parents with impressionable children in the vehicle, are strongly encouraged to practice safe, legal driving behaviors. Lives depend on it."

Over and above the enforcement efforts, the "It's Not Worth It!" campaign continued to make drivers and the public aware of the dangers of distracted driving, as well as the high cost of tickets, through Caltrans changeable message signs over highways, DMV messaging in field offices, plus internet, social media and other outreach. Costs for violating the cell phone laws start at \$162 for the first offense and \$285 for subsequent offenses. Other violations for actions that can be classified as distracted driving can range even higher. More important are the hundreds killed and thousands seriously injured every year due to drivers thinking they can operate a vehicle safely while engrossed in talking or texting on a cell phone.

Following a few uncomplicated steps would go a long way in keeping you safe from distracted driving:

- Put your cell phone out of reach or turn it off when you get in the car so you won't be tempted to use it.
- Mention on your outgoing voicemail message that you can't answer because you might be driving.
- Don't call or text anyone when there is a good chance that they may be driving.
- If you must call or text, pull into a parking space. The extra couple of minutes are worth it.
- The ability to safely multi-task while driving is myth. Cell phone use actually diminishes the brain's ability to drive safely.
- Never check Facebook, run an app, read or otherwise allow your full attention to leave the task of safely driving.
