**Cost-Sharing Pension Plan – CalPERS Miscellaneous Risk Pool
GASB No. 68 Information – Fiscal Year Ended June 30, 2024**

Santa Cruz County Regional Transportation Commission

General Information

Plan Description. All qualified permanent and probationary employees are eligible to participate in the Commission's Miscellaneous Employee Pension Plans, cost-sharing multiple employer defined benefit plans administered by the California Public Employees' Retirement System (CalPERS). Benefit provisions under the Plans are established by State statute and Commission resolution. CalPERS issues publicly available reports that include a full description of the pension plans regarding benefit provisions, assumptions and membership information that can be found on the CalPERS website.

Plan Provisions. CalPERS provides service retirement and disability benefits, annual cost of living adjustments and death benefits to plan members, who must be public employees and beneficiaries. Benefits are based on years of credited service, equal to one year of full-time employment. Members with five years of total service are eligible to retire at age 50 with statutorily reduced benefits. All members are eligible for nonduty disability benefits after 10 years of service. The death benefit is one of the following: The Basic Death Benefit, the 1957 Survivor Benefit, or the Optional Settlement 2W Death Benefit. The cost-of-living adjustments for each plan are applied as specified by the Public Employees' Retirement Law.

The Plans' provisions and benefits in effect on June 30, 2024, are summarized as follows:

| | Hire Date Prior to January 1, 2013 | On or after January 1, 2013 |
|---|---------------------------------------|-----------------------------|
| Benefit formula | 2.0% @ 55 | 2% @ 62 |
| Benefit vesting schedule | Five years of service | Five years of service |
| Benefit payments | Monthly for life | Monthly for life |
| Retirement age | 50-63 | 52-67 |
| Monthly benefits, as a % of eligible compensation | 1.4% to 2.4% | 1.0% to 2.5% |
| Required employee contribution rates | 6.92% | 7.75% |
| Required employer contribution rates | 12.47% | 7.68% |

Contributions. Section 20814(c) of the California Public Employees' Retirement Law requires that the employer contribution rates for all public employers be determined on an annual basis by the actuary and shall be effective on the July 1 following notice of a change in the rate. Funding contributions for the Plan is determined annually on an actuarial basis as of June 30 by CalPERS. The actuarially determined rate is the estimated amount necessary to finance the costs of benefits earned by employees during the year, with an additional amount to finance any unfunded accrued liability. The Commission is required to contribute the difference between the actuarially determined rate and the contribution rate of employees. Contributions to the pension plan from the Commission were \$313,664 for the fiscal year ended June 30, 2024.

Santa Cruz County Regional Transportation Commission

Pension Liabilities, Pension Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions

At June 30, 2024, the Commission reported a liability of \$1,760,245 for its proportionate share of the net pension liability. The net pension liability was measured as of June 30, 2023 and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of June 30, 2022 rolled forward to June 30, 2023 using standard update procedures. The Commission's proportion of the net pension liability was based on a projection of the Commission's long-term share of contributions to the pension plan relative to the projected contributions of all Pension Plan participants, actuarially determined. At June 30, 2023, the Commission's proportion was 0.035202%, which increased by 0.000382% from June 30, 2022.

| | June 30, 2024 |
|---|---------------|
| Commission's proportionate share of the net pension liability | \$1,760,245 |

The following presents the Commission's proportionate share of the net pension liability calculated using the discount rate of 6.90 percent, as well as what the Commission's proportionate share of the net pension liability would be if it were calculated using a discount rate that is 1-percentage-point lower (5.90 percent) or 1-percentage-point higher (7.90 percent) than the current rate:

| | 1% Decrease (5.90%) | Current Discount Rate (6.90%) | 1% Increase (7.90%) |
|--|------------------------|-------------------------------------|------------------------|
| Proportionate share of the net pension liability | \$3,572,592 | \$1,760,245 | \$268,528 |

Cost-Sharing Pension Plan – CalPERS Miscellaneous Risk Pool
GASB No. 68 Information – Fiscal Year Ended June 30, 2024

Santa Cruz County Regional Transportation Commission

For the year ended June 30, 2024, the Commission recognized pension expense of \$796,811. Pension expense represents the change in the net pension liability during the measurement period, adjusted for actual contributions and the deferred recognition of changes in investment gain/loss, actuarial gain/loss, actuarial assumptions or method, and plan benefits. At June 30, 2024, the Commission reported deferred outflows of resources and deferred inflows of resources related to pension from the following sources:

| | Deferred Outflows of Resources | Deferred Inflow of Resources |
|---|-----------------------------------|---------------------------------|
| Pension contributions subsequent to measurement date | 313,664 | 0 |
| Differences between expected and actual experience | 89,923 | 13,949 |
| Changes in assumptions | 106,274 | 0 |
| Net difference between projected and actual earnings on retirement plan investments | 285,000 | 0 |
| Adjustment due to differences in proportions | 286,859 | 23,252 |
| Difference in actual contributions and proportionate share of contributions | 51,644 | 50,100 |
| Total | 1,133,364 | 87,301 |

\$313,664 reported as deferred outflows of resources related to pensions resulting from Commission contributions subsequent to the measurement date will be recognized as a reduction of the net pension liability in the year ended June 30, 2025. Other amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in the pension expenses as follows:

| Year Ended | Deferred Outflow (Inflows) |
|------------|----------------------------|
| 2025 | 314,825 |
| 2026 | 194,604 |
| 2027 | 214,791 |
| 2028 | 8,179 |
| 2029 | 0 |
| Thereafter | 0 |
| Total | 732,399 |

Cost-Sharing Pension Plan – CalPERS Miscellaneous Risk Pool
GASB No. 68 Information – Fiscal Year Ended June 30, 2024

Santa Cruz County Regional Transportation Commission

The collective total pension liability for the June 30, 2023 measurement period was determined by an actuarial valuation as of June 30, 2022, with update procedures used to roll forward the total pension liability to June 30, 2023. The collective total pension liability was based on the following assumptions:

| | |
|----------------------------------|--|
| Investment rate of return | 6.90% |
| Inflation Rate | 2.30% |
| Salary Increases | Varies by entry age and service |
| Post-Retirement benefit increase | Derived using CalPERS' Membership Data for all Funds Contract COLA up to 2.30% until Purchasing Power Protection Allowance Floor on Purchasing Power applies |

The mortality table was developed based on CalPERS-specific data. The rates incorporate Generational Mortality to capture ongoing mortality improvement using 80% of Scale MP 2020 published by the Society of Actuaries. For more details, please refer to the 2021 experience study report that can be found on the CalPERS website.

Long Term Expected Rate of Return. In determining the long-term expected rate of return, CalPERS took into account long-term market return expectations as well as the expected pension fund cash flows. Projected returns for all asset classes are estimated and combined with risk estimates, are used to project compound (geometric) returns over the long term. The discount rate used to discount liabilities was informed by the long-term projected portfolio return.

The expected real rates of return by asset class are as followed:

| Asset Class | Assumed Asset Allocation | Real Return Years 1 - 10 ^{1,2} |
|--------------------------------|--------------------------|---|
| Global equity - cap-weighted | 30.00% | 4.54% |
| Global equity non-cap-weighted | 12.00% | 3.84% |
| Private Equity | 13.00% | 7.28% |
| Treasury | 5.00% | 0.27% |
| Mortgage-backed Securities | 5.00% | 0.50% |
| Investment Grade Corporates | 10.00% | 1.56% |
| High Yield | 5.00% | 2.27% |
| Emerging Market Debt | 5.00% | 2.48% |
| Private Debt | 5.00% | 3.57% |
| Real Assets | 15.00% | 3.21% |
| Leverage | -5.00% | -0.59% |

¹ An expected inflation of 2.30% used for this period.

² Figures based on the 2021-22 Asset Liability Management study.

Discount Rate. The discount rate used to measure the total pension liability for PERF C was 6.90%. The projection of cash flows used to determine the discount rate assumed that contributions from plan members will be made at the current member contribution rates and that contributions from employers will be made at statutorily required rates, actuarially determined. Based on those assumptions, the Plan's fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

Actuarial Certification

This report was prepared in accordance with generally accepted actuarial principles and practices. We relied on the GASB 68 Accounting Reports, provided by CalPERS, prepared for the miscellaneous risk pool, a cost-sharing multiple-employer defined benefit pension plan.

Throughout the report, we have used unrounded numbers, because rounding and the reconciliation of the rounded results would add an additional, and in our opinion unnecessary, layer of complexity to the valuation process. By our publishing of unrounded results, no implication is made as to the degree of precision inherent in those results. Clients and their auditors should use their own judgment as to the desirability of rounding when transferring the results of this report to the clients' financial statements.

Each undersigned actuary meets the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion contained in this report.
