B. PROJECT BENEFITS/ EVALUATION CRITERIA

Information in this section will be used to evaluate projects. The RTC is required to consider how well projects advance regional, state and federal goals, policies, performance metrics and targets, including how projects will contribute towards implementation of the long-range transportation plan (Regional Transportation Plan) and other state and federal regulations including the California Complete Streets Act of 2008, SB375, the Federal FAST Act.

Streets Act of 2008, SB375, the Federal FAST Act. See Attachment 2 of the call for projects for examples of type of information to demonstrate benefits. **Project Title:** Coastal Rail Trail Segments 8 and 9 Construction Generally, what are the benefits of this project? How does this project address any of Projects are not expected to address all of these; if not applicable or not a primary purpose, the following criteria? write "N/A". This project serves active transportation users of all ages and abilities. The design of the 1 Access for All facility fully separates people walking, biking, and rolling from vehicular traffic via a multiuse trail. This facility type offers the lowest level of traffic stress. A fully seperated facility removes conflicts between people walking and biking and those in cars, increasing safety. This project addresses a linear active transportation corridor to address collisions systematically along the route. This project aims to create a new route that is low stress for active transportation users of all ages and abilities. Between 2010-2020, there were 188 total collisions in the project influence area. Of these, 4 people were killed and 184 were injured. Bike collisions accounted for 69.6% of collisions, pedestrian 2 **Collisions and Safety** collisions for 30.4%. Once this project is completed, active users will be able to travel between the City and County on a facility completely separated from motor vehicles, reducing the volume of vehicles to zero. The National Highway Safety Administration identifies separation of non-motorized users as one of the highest safety benefits. The creation of a separated active transportation route between these two areas of high population density encourage higher rates of walking and biking. System Preservation & 3 Infrastructure Condition Mode Shift: Gap Cosure: This project connects between Segments 7 and 10/11. Segment 7 provides two miles of complete rail trail. Segment 10/11 will extend the trail over 4 miles, and are currently in the design phase and seeking construction funds. The proposed project will construct a missing segment between these two facilities and connect to a planned network of over 32 miles of multiuse trail. The project closes the gap by constructing a System Performance multiuse path within the existing railroad right-of-way which extends from the City of Santa Cruz in to the County of Santa Cruz. This gap closure connects four schools, two low income medical and dental clinics, two clusters of affordable housing development, public beaches, a state park, Simpkins Swim and Community Center, and the Boys and Girls Club. This project connects to transit route 3, providing critical access for DAC residents to access employment and education. System Reliability:

| | | Santa Cruz County has unacceptably high rates of collisions involving bicyclists and pedestrians, a major public health issue. The project area includes a high number of non-motorized collisions. The larger project area includes a high number of non-motorized collisions however, there are no collisions directly on the project because there is currently no bicycle or pedestrian access along the rail line – this will change dramatically if the project is built. Currently, bicyclists and pedestrians are forced to travel along major arterials that roughly parallel the project in order to pass through this densely populated urban area. Non-motorized collisions have occurred regularly over the past 10 years, in all seasons, throughout the week, and at all times of day. There is no single cluster of | | | | | | |
|----|---|--|--|--|--|--|--|--|
| 5 | Public Health | collisions, rather collisions occur all along the project and within the project influence area. Improper turning, unsafe speed, automobile right of way, and pedestrian violation were the reported reasons for the greatest number of collisions. This project directly addresses these collision types by physically separating active users from motor vehicles on a continuous multiuse path, limiting potential conflict points where improper turning, auto speed, automobile right-of-way, and pedestrian violations can occur. In addition to being a safer alternative to the busy arterial, it is a direct route within the DAC to many destinations that serve the DAC community, seniors, youth, and disabled children including Live Oak Elementary, Del Mar Elementary, and affordable housing in the Beach Flats. | | | | | | |
| 6 | Benefits to Equity Priority Communities | This project will close an over two mile gap in the Rail Trail and address an active transportation deficiency which adversely impacts the regions' most vulnerable residents. Median Household Income (MHI) in the project benefit area is \$63,787. The lowest MHI of the Census tracts in the project benefit area is \$34,660 (Tract 1010), 46% of the state average MHI. The project area encompasses the low-income Beach Flats neighborhoods (Tract 1010) and terminates in the diverse Live Oak neighborhood, home to Live Oak Community Resources which provides rental income and food distribution. This project is located within and directly connects to the lowest income households in the Santa Cruz community, allowing these economically disadvantaged (DAC) households access to employment, education, and community identified destinations without the added transportation costs of a personal vehicle. | | | | | | |
| 7 | Climate Change and Resiliency | Transportation makes up over 60% of GHG emissions in our region. This project will construction a separated bicycle and pedestrian facility connecting key community destinations. This project, and projects like it, offer a path towards a zero emission transportation future that is low stress, and appropriate for users of all ages and abilities. | | | | | | |
| 8a | Funding- Overall Funding Plan: If RTC approves the requested funds, will the project be fully funded? If not, how much additional funding is needed, and what is the likelihood of securing | No. The City of Santa Cruz currently has a \$20.8M funding request in to the federal Safe Streets and Roads for All (SS4A) program. That program anticipates announcing awards in December 2025, around the same timeline as this funding program. The Consolidate Call funding request would provide funds to match the SS4A federal funds. With these both secured the project would be fully funded. | | | | | | |
| 8b | Committed Funding: What other funding has been secured for the project? | Past funding from Measure D, CNRA, the Land Trust, and ATP Cycle 3 has been committed to this project. That funding was for the San Lorenzo Trestle Bridge widening and the preconstruction phases of this project. An ATP Cycle 6 grant is secured for construction. The funding requested in this application would augment that construction funding to close the existing funding gap. | | | | | | |

| | Leveraging: Will the funds you are | Yes. The requested funding in this application would be used to leverage the SS4A funding |
|-------------|---------------------------------------|---|
| | requesting from RTC be used to | application. This funding would not be at risk as the City would seek other funds, but this |
| 8c | leverage other grants? If so, please | could involve delaying other transportation projects. |

| | | |
| 9e | Other: Describe any other | Funding is currently the largest risk. |
| 10 | potential risks and plans to | |
| 10 | Consistency with Complete | Existing alternate routes are arterials with high speeds and volumes of vehicles. Most lack |
| | Streets guidelines and policies: | active transportation facilities, or those that exist are high stress and not appropriate for |
| | | users of all ages and abilities. The Monterey Bay Area Complete Streets Guidebook notes that |
| | with guidelines and integrates | novice and child bicyclists need off road facilities and a connected network (Table 3, page |
| | complete streets elements. | 35). The Rail Trail as a shared use trail ranks as Green (the best) using the Multimodal Level of |
| | | Service in Appendix C of the Complete Streets Plan. |

Public engagement: Was this project identified as a priority by the community? How was it determined to be a priority? How have residents in the project area been involved in the decision-making or project information process to date?

Yes. The vision for a countywide rail trail was developed through a 2.5 year planning and public outreach process. For implementation, the rail trail is divided into twenty segments. Segments 8 and 9 (this application) ranked as 2nd and 3rd highest community priorities countywide due to their proximity to activity centers, population density, coastal access, cost, public input, and ability to close gaps in the active transportation network. Currently, many families in the DAC neighborhoods struggle to access basic needs due to limited transportation options, lack of vehicle ownership, and limited access to public transit. This project runs within one-mile of 48,000 residents (25% of County population), 15 schools, and 37 parks. Construction of the highest ranked Segment 7 is underway connects to this project.

Outreach: Describe how the public and stakeholders were/will be engaged in the development and implementation of the project (e.g. intended outreach methods, activities, pop-up planning events; planning activities at community events; community workshops; design charrettes; online and social media, etc.)

The City and County of Santa Cruz was awarded an Active Transportation Program Cycle 3 grant, funding the design, permitting, and environmental phases of Rail Trail Segment 8 and 9. This project is currently underway. As part of this, an extensive public engagement process is underway to further refine the Master Plan designs. During project initiation, project updates were regularly provided at meetings open to the public including the Santa Cruz County Regional Transportation Commission meetings, County Board of Supervisors, Interagency Technical Advisory Committee, and Bicycle Advisory Committee meetings. Due to COVID, most meetings were conducted online, and project staff found that the convenience of online meetings increased public participation. An online EIR scoping meeting was held in November 2021 with approximately 60 attendees. Draft project designs were presented to the public in April 2022 to solicit input on alignment, community connections, and design options during two open houses. Material was presented in English and Spanish, and translators were available for monolingual Spanish attendees. Open houses were advertised online, in newspapers, to schools, and with local support groups and non-profits. The Bicycle Advisory Committee and Elderly and Disabled Transportation Advisory Committee (E&DTAC) were also engaged to solicit feedback on how project could better serve their represented populations.

|-----|--|--|
| 11c | ensure participation from diverse and historically underrepresented members of the public in project planning? What specific outreach to low-income, BIPOC (Black, | While this project is broadly supported by the entire community, specific, recent outreach was done within the DAC census tracts to verify the desire for this project. Bilingual staff attended multiple events within the DAC communities of Live Oak and the Beach Flats, including bi-monthly food distribution, Boys and Girls Club after school program, Caminando por el Bienestar programs in Live Oak, Bike and Walk to School Day (BWTS) at Live Oak Elementary, community center summer camp for elementary age children, popup outreach in two parks within Census Tract 1010, and the Visita Familiar event at Chanticleer Park. During engagement at Caminando por el Bienestar with primarily monolingual Spanish-speaking families, many mothers noted their families only have one car and it is used by their husbands to get to work. As a result, most of them walk to destinations because buses don't come frequently enough. They noted how many areas don't feel safe to walk because of missing sidewalks or roadways that are dangerous to cross. During outreach at food pantry distribution, neighborhood families expressed strong support for this project to create safe spaces for their families to be able to walk and bike, and support for safe routes for children to take to school. Tourism traffic heading to the Boardwalk amusement park heavily impacts this area, and parents universally expressed fears of their children walking, and biking because of the high speeds of traffic from tourists trying to "cut through" to find parking to go to the Boardwalk. Neighborhood families at BWTS noted drivers not yielding at crosswalks and how scary it is to bike along roads with traffic that is "sooooo fast". They said they wanted crosswalks to have the "flashy lights" because they work much better to stop traffic. At all events, families were struggling with the high gas prices and noted biking is much more affordable, but they often didn't feel safe riding with traffic, especially with their kids. Parents said this project would make them feel mor |

Rail Trail 8/9

Detailed Project Description/Scope

Rail Trail Segments 8 and 9 extend 2.18 miles from the wharf in the City of Santa Cruz and 17th Avenue in the County of Santa Cruz. New multiuse trail in this corridor will connect people to schools, jobs, housing, parks and open space, medical facilities, grocery stores, and other daily needs.

In partnership with the RTC and County of Santa Cruz, the City of Santa Cruz has been working diligently on preconstruction activities for Segments 8 and 9 of the rail trail. Preconstruction activities have been funded with a California Active Transportation Program grant, funding from the Santa Cruz County Land Trust, and Measure D. Design is underway and progressing.

As the design activities have progressed, project partners have identified a significant funding gap. This project has been incredibly successful at securing outside funding, which speaks to the transformative opportunity it offers our community. While staff created grant cost estimates with the best available knowledge in early 2022, multiple factors have led to cost increases and a large funding gap. These include unprecedented construction cost escalation, unanticipated seismic issues, increases in the cost of materials, changes to the design as the result of the ZEPRT project, and increased right of way needs to accommodate the increased horizonal off-sets.

This funding request is for construction funding for Segments 8 and 9 of the Rail Trail to address that funding gap and be able to deliver the project. Specifically, this application seeks funding in three parts:

1. Segment 9 Construction Funds: The priority use of these funds is to provide the \$5M non-federal match for Federal Safe Streets and Roads for All (SS4A) federal grant application. The City of Santa Cruz submitted a SS4A grant requesting \$20.8M for Segment 8/9 Construction funding, which requires a 20% local match. If awarded, the City of Santa Cruz would use consolidated grant funding to match federal SS4A grant dollars. Award announcements are anticipated in December 2025. If not awarded, these funds would be dedicated to construction of Segment 9 and seeking additional outside funding.

- 2. Early action on Segment 8 (\$3M): These funds would advance construction of Segment 8 prior to Segment 9. Securing these non-federal funds would create the opportunity to construct Segment 8 of the Rail Trail beginning in late summer 2026 with a completion date in Spring 2027. Advancing this segment would preserve existing grant funds for the more complicated and expensive Segment 9, and avoid cost increases as the result of inflation and escalation from waiting to construct Segments 8 and 9 together in a single package.
- 3. Murray Street Bike and Pedestrian Access (\$2M): With the construction of the Murray Street Bridge seismic retrofit project, the Santa Cruz City Council has directed staff to seek methods to create continuous bike and pedestrian access across the harbor by utilizing the existing rail line. The City is pursuing preconstruction design with other local funds. This portion of the funding request would secure funding to implement a bike and pedestrian path on Segment 9 of the Rail Trail across the Santa Cruz Harbor using the existing rail bridge. Pending RTC direction, this could be a permanent bridge or a demonstration.

Project Schedule

This application seeks construction funding for Segment 8/9 of the Rail Trail. The Segment 8/9 project certified its Environmental Impact Report (EIR) in March 2023, completed its schematic design phase in June 2023, and was programmed to begin construction as early as July 2026 (Fiscal Year 26-27). As noted above, these three project elements could be delivered independently, and as a package advance Segment 8 and 9 Construction for a continuous multiuse facility from the wharf in the City of Santa Cruz to 17th Avenue in the County.

A portion of this funding request is for Construction funding for Segment 8. The City is currently reviewing 90% plans for Segment 8, with construction documents anticipated by the end of the calendar year. If funding is secured, Segment 8 construction is anticipated to begin in fall 2026, after the busy summer season, and be complete in spring 2027.

For Segment 9, the project completed concept design and began 60% design in June 2023 but has since been working through additional design efforts. Key drivers of this additional design work include seismic analysis of the Harbor Railroad (Woods Lagoon) bridge, increasing off-sets from the MBSST Master Plan to accommodate the Zero Emission Passenger Rail and Trail (ZEPRT) project, and resulting increased right of way needs. These changes have added time and cost to

the project. The design effort continues and there is a separate funding application for those efforts. If adequate funding is secured, design could be completed in December 2026. The right-of-way phase is a substantial effort which is expected to last into early 2027. If all funding lines up, construction will begin at the end of 2027 and last 3 years.

For the component of Segment 9 on the Murray Street rail Bridge, the City of Santa Cruz is currently coordinating with project partners, including the RTC. Design is underway. Pending approvals and securing funding, this project is planned to go to construction in early 2026. Construction is anticipated to take less than 3 months.

Existing Project Funding

In December 2016 Segments 8 and 9 were awarded an Active Transportation Program Cycle 3 grant for the planning and design phase of the project totaling \$3M, matched with \$1.5M from the Land Trust. Subsequently in December 2022, an ATP Cycle 6 grant was awarded for right-of-way and construction phases totaling \$34.8M, matched with Measure D from the City (\$1.5M), County (\$1.5M), and SCCRTC (\$2.37M). That totals \$44.6M in programed project funding for construction of the trail. In June 2025 the SCCRTC was awarded a RAISE Grant that is anticipated to add \$2.8M in construction funding to the project.

While the project has \$44.6M programmed for Rail Trail Segments 8 and 9, the project needs between \$25M-\$40M of additional funding to complete design, right-of-way, and construction depending on cost escalation and results of grant applications. To cover additional project costs, the City has applied for additional funding with support from the County and SCCRTC. In July 2025, the City applied for a Safe Streets for All Grant (SS4A), requesting \$20.8M in federal funds for right-of-way and construction. This funding application would provide \$5M for the local match for the SS4A grant, securing \$20.8M in outside funds. The City also applied for an Environmental Enhancement Mitigation grant to fund a portion of the required environmental mitigations for the project.

Outreach and Engagement:

The vision for a countywide rail trail was developed through a 2.5 year planning and public outreach process. For implementation, the rail trail is divided into twenty segments.

Segments 8 and 9 (this application) ranked as 2nd and 3rd highest community priorities countywide due to their proximity to activity centers, population density, coastal access, cost, public input, and ability to close gaps in the active transportation network. Currently, many families in the DAC neighborhoods struggle to access basic needs due to limited transportation options, lack of vehicle ownership, and limited access to public transit. This project runs within one-mile of 48,000 residents (25% of County population), 15 schools, and 37 parks. Construction of the highest ranked Segment 7 is underway connects to this project.

This project is part of the Monterey Bay Sanctuary Scenic Trail (MBSST), a community-driven vision to transform transportation and coastal access throughout Santa Cruz County. The framework for this project was defined through a three year long public and stakeholder engagement process, which resulted in the award willing MBSST Rail Trail Master Plan which was adopted in 2013. Outreach and public engagement, which started in 2011, have continued for over a decade. There is a long history of an active and interested public for this project. In November 2016, Santa Cruz County voters approved Measure D – which commits 17% of a new sales tax revenues for trail construction, maintenance and management. Voters approved this Measure by over 67%, with various coalitions of active transportation stakeholders coming together to champion Coastal Rail Trail projects as part of the funding package.

For over two decades, project leaders have engaged residents, advocates, non-profits, mobility and disability advocates, the DAC community, businesses, social organizations, adjacent landowners, and state and federal agencies in envisioning the Monterey Bay Sanctuary Scenic Trail Network. Engagement for the MBSST Master Plan included stakeholder interviews and public workshops. Stakeholders representing community and advocacy included non-profits Ecology Action, Sierra Club, Land Trust Santa Cruz County, Friends of the Rail and Trail, the Chambers of Commerce, the railroad operator and the Farm Bureau of Santa Cruz County. Public agencies included Planning/Public Works Departments for the Cities of Capitola, Santa Cruz, Scotts Valley and Watsonville and the County of Santa Cruz, the California Coastal Commission, the California Coastal Conservancy, and California State Parks. With the Master Plan complete, more refined engagement for each segment of rail trail has transpired.

The City and County of Santa Cruz was awarded an Active Transportation Program Cycle 3 grant, funding the design, permitting, and environmental phases of Rail Trail Segment 8 and 9. This project is currently underway. During project initiation, project updates were regularly provided at meetings open to the public including the Santa Cruz County Regional Transportation Commission meetings, County Board of Supervisors, Interagency Technical Advisory Committee, and Bicycle Advisory Committee meetings. Due to COVID, most

meetings were conducted online, and project staff found that the convenience of online meetings increased public participation. An online EIR scoping meeting was held in November 2021 with approximately 60 attendees. Draft project designs were presented to the public in April 2022 to solicit input on alignment, community connections, and design options during two open houses. Material was presented in English and Spanish, and translators were available for monolingual Spanish attendees. Open houses were advertised online, in newspapers, to schools, and with local support groups and non-profits (see supporting documents for photo of advertising in English and Spanish). The Bicycle Advisory Committee and Elderly and Disabled Transportation Advisory Committee (E&DTAC) were also engaged to solicit feedback on how project could better serve their represented populations. The chair of the E&DTAC is legally blind, so project leaders verbally described the project improvements to allow the chair to provide meaningful feedback on how to make the trail more accessible to disabled users.

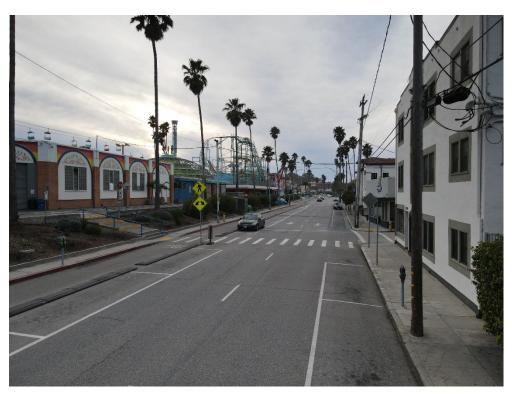

The City of Santa Cruz actively maintains a project website for all Coastal Rail Trail projects within our jurisdiction (www.cityofsantacruz.com/coastalrailtrail). This site contains project information, maps, recorded public meetings, presentations from public meetings, and environmental review information. The City will continue to maintain an updated project website for this project. Additionally, the Regional Transportation Commission maintains an updated project FAQ here: https://sccrtc.org/wp-content/uploads/2021/12/Fact-Sheet_MBSST_Segment-8_9_updated.pdf

E. CERTIFICATION AND ASSURANCES

As authorized representative for my agency, I hereby certify that the information contained in this application, including required attachments, is accurate and hereby certify the following:

| Project: | Coastal Rail Trail Segments 8 and 9 Construction | INITIALS |
|----------|---|----------|
| 1 | The project implementing agency possesses legal authority to nominate projects and to finance, acquire, construct, and/or implement the proposed project; | NN |
| 2 | This project is among the highest priorities for this agency; | NN |
| 3 | The proposed transportation investments have received the full review and vetting required by law; | MM |
| 4 | Such investments are an appropriate use of taxpayer dollars. The agency shall adhere to principles and policies that ensure government oversight and management of the contracting process to ensure taxpayer funds are spent wisely; contracts are not wasteful, inefficient, or subject to misuse; unnecessary no-bid and cost-plus contracts are avoided; and contracts are awarded according to the best interests of California taxpayers; | NN |
| 5 | The agency will maintain and operate the property acquired, developed, rehabilitated, or restored for the life of the resultant facility(ies) or activity. I understand that with the approval of the California Department of Transportation, the Administering Agency or its successors in interest in the property may transfer the responsibility to maintain and operate the property; | NN |
| 6 | If these new funds are used to replace funds previously committed to this project, the agency will maintain its effort with regard to redirecting those funds to similar transportation projects; | 44 |
| 7 | The agency will give RTC and California Department of Transportation's representative access to and the right to examine all records, books, papers, or documents related to the project; | ŊΝ |
| 8 | Work on the project shall commence within a reasonable time after receipt of notification that funds have been approved, allocated or obligated, as applicable, and that the project will be carried to completion with reasonable diligence; | NN |

| 9 | The agency will comply where applicable with provisions of the California Environmental Quality Act, the National Environmental Policy Act, the Americans with Disabilities Act, the Secretary of the Interior's Standards and Guidelines for Archaeology and Historic Preservation, and any other federal, state, and/or local laws, rules and/or regulations; | ทท |
|----|---|----|
| 10 | The agency shall comply with all reporting requirements outlined by FHWA, FTA, RTC, Caltrans, the California Transportation Commission (CTC) or state statute, as applicable; | NN |
| 11 | The agency will commit the funds necessary to ensure this project is fully funded. | NN |
